DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 18-26, drawn to a method and system for selecting a new master for a piconet after disappearing of the old master, classified in class 370, subclass 338.
 - II. Claims 14-17, drawn to a bluetooth device, classified in class 370, subclass 463.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for selecting a new master among the slaves after disappearing of the old master which is distinct from invention II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2665

6. A telephone call was made to Dr. Mark Friedman on 3/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
